

Sales performance: from insight to action

Sporting goods distribution, Indonesia | 2020–2022

Efficiency gap & product forecast

Rp3.10bn vs Rp11.37bn Revenue per prospect: Bali-Nusa Tenggara (lowest, 12 prospects) vs. Sumatera-Kalimantan (highest, just 6 prospects) — a 4x efficiency gap.	−34.1% Projected decline in top-5 product revenue by 2025 if the current 3-year trend continues untouched.	+6.1% Achievable growth by 2025 for the same 5 products with just a 2%/year target instead.
--	--	---

Recommendations for Step 6

1 Rebalance by trend, not size Diagnose Online team's -50.6% decline; sustain Java's +43.3% rebound.	2 Watch the leading region Sulawesi-Maluku is #1 but down 15.1% since 2020 — track it closely.
3 Close the efficiency gap Replicate Sumatera-Kalimantan's Rp11.37bn/prospect approach in Bali-NT.	4 Recover order value Confirmed 3-year, -13.66% AOV decline; pilot bundling & upsell.
5 Act on the product forecast Top 5 products: -34% by 2025 if untouched, vs. +6% with a growth target.	6 Rebalance partners & seasons Support bottom-10 stores; plan around real peaks (April & November).
